

Software Engineering

Class 1

Fall 2026

Groups A & B & F

Eloi Puertas – epuertas@ub.edu

Marcos Palomino - mpalomino@ub.edu

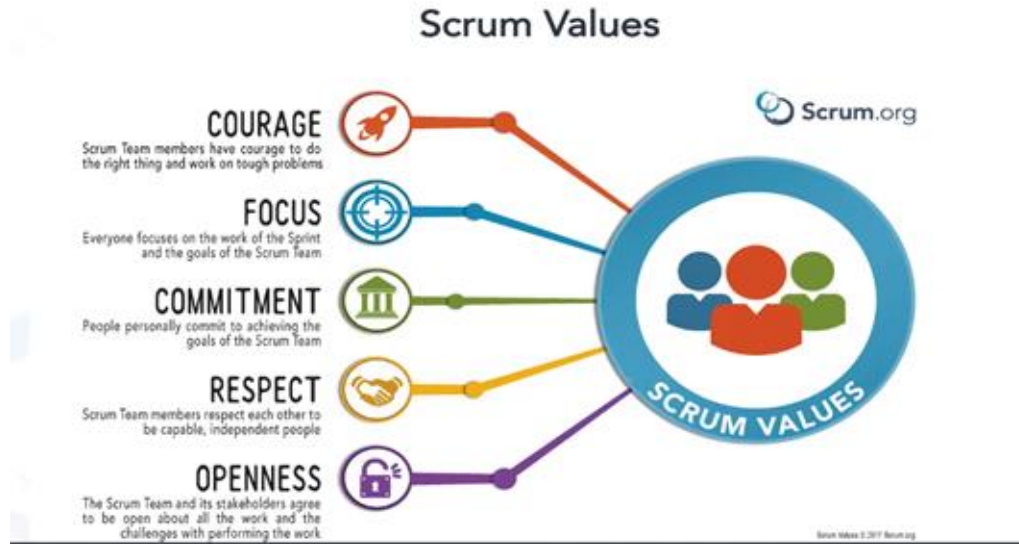

Eduardo Urruticoechea - e.urruticoechea@ub.edu

Class SCHEDULE

- **[Set 22 & 23]** **Class 1: Project KickOff.**
- **[Set 29 & 30]** **Class 2: Backlog check.**
- **[Oct 6 & 7]** **Class 3: Deliver Backlog. Start Sprint 0.**
- **[Oct 13 & 14]** **Class 4: Sprint 0 check**
- **[Oct 20 & 21]** **Class 5: Deliver Demo S0. Retrospective Sprint 0. Start Sprint 1.**
- **[Oct 27 & 28]** **Class 6: Sprint 1 check [Q1]**
- **[Nov 3 & 4]** *Examens, no class*
- **[Nov 10 & 11]** **Class 7: Deliver Demo S1. Retrospective Sprint 1. Start Sprint 2.**
- **[Nov 17 & 18]** **Class 8: Sprint 2 check.**
- **[Nov 24 & 25]** **Class 9: Deliver Demo S2. Retrospective Sprint 2. Start Sprint 3.**
- **[Dec 1 & 2]** **Class 10: Sprint 3 check. [Q2]**
- **[Dec 8 & 9]** *Holidays*
- **[Dec 15 & 16]** **Class 11: Deliver Final PRODUCT (S3).**
- **[Dec 22]** **FINAL PITCH**

THE PROJECTS

- Team work (5-7 people)
- Rough copies of real-world well-known companies
- You'll be the owner of the technology: you'll decide
- The ownership of the product will be shared, but the final word will be in our hands.

THE PROJECTS

Fintech: (Group F)

- <https://www.n26.com>
- <https://www.bbva.com/>
- <https://www.revolut.com/>
- <https://traderepublic.com/>

Portals Immobiliaris(Group B)

- <https://www.idealista.com/>
- <https://www.fotocasa.com/>
- <https://www.habitaclia.com/>

Distribució de bens(Group A)

- <https://www.glovo.com/>
- <https://www.ubereats.com/>
- <https://www.passodecuinar.cat/>

Xarxa Socials de Mobilitat compartida (Group C)

- <https://www.blablacar.com>
- <https://www.tribbu.com>
- <https://www.bicing.es>
- <https://www.cooltra.com>

GROUP ROLES

- **Tech Roles:**
 - Frontend developer
 - Backend developer
 - DevOps
 - QA
- **Scrum Roles:**
 - Scrum master [Part time]: In charge of the coordination and responsible to upload the weekly workload.
 - Product Owner [Part time]: Product vision and backlog changes

[Minimum two different tech roles during the project]

(some of the) PROJECT MANAGEMENT TOOLS

Changing Roles: Scrum to AI-SDLC

The team's focus shifts from manual tasks to higher-level judgment and accountability

ROLE	TRADITIONAL SCRUM (MANUAL)	AI-SDLC (AI-AUGMENTED)
Developers	Code generation, manual debugging, writing and executing unit tests.	AI Orchestrators: Reviewing AI-generated code and focusing on architecture.
Product Owner	Writing user stories from scratch, manual backlog prioritization, gathering requirements.	Value Validators: Using AI to draft stories, validating AI insights against market needs, and focusing on product vision.
Scrum Master	Facilitating meetings, tracking velocity, manual roadblock removal, interpreting dashboards.	Accountability Owners: Defining boundaries for AI, coordinating feedback loops.

AI as the Co-Pilot

AI accelerates execution but does not replace your engineering intuition.

Developers & QA

AI acts as a coding assistant and automates test generation,

Product Owner

AI assists in drafting concise user stories, identifying missing acceptance criteria

DevOps

Assists on developing and monitoring CI/CD deployment pipeline

The Limits of Ownership

What AI Delivers

AI provides speed, fast development, pattern recognition, and consistent adherence to formatting standards.

What Humans Own

You own the strategic decision-making, system architecture, and product vision.
The team is the ultimate owner of the technology.

FOR THE NEXT SESSION: Pre-planning phase

- 1. Work on the USER STORIES**
- 2. Start RUNNING coordination meetings to manage the backlog.**
- 3. Start the BACKLOG creation**
 - By the end of the planning, the Team should be able to explain how it intends to work as a self-organizing team to accomplish the goals**
